

## **My journey in Australia**

Hello everyone !

The first two weeks of my trip were awesome. I have done a lot of incredible things. First of all, my plane landed in Perth, the most isolated and the sunniest city in the world. In Perth, I started with surfing (I was pretty good). On the third day, I rode a bike. Before, I had never gone rock climbing and I thought it was the moment to do it for the first time. Then I went to Tasmania, I observed the most beautiful waterfalls and the big whales. I saw the tasmanian devil, it's very aggressive. I have been to Melbourne to observe the platypuses and I think I saw Perry the platypus. I wanted to ski but I didn't have the necessary. On the second week, I went to Queensland. I did bungee-jumping, I had never done it before so I was really scared. It's the most fantastic thing I have done in those two weeks. After, I went to Sydney and I was really surprised by the redback spiders, I have already seen one before (but on the Internet) in real they're scary. Sydney's inhabitants are very friendly and they told me that the redback spider loves the urban areas. I have been to Adelaide to go rafting and practise canoeing on the Lake Eyre. Then, I met the kangaroos they are so cute but they don't like to get approached. Finally, I went to Canberra to visit the city and take some rest. After, I'll go back to Queensland to dive in the Great Barrier Reef and to the Northern Territory to meet the Crocodiles and fly in a hot-air ballon. I have not been to Spot X yet.

It is all I have to say about the first two weeks of my journey. Goodbye !
